

TAIYO OIL CO., LTD.

Energy for this planet and its people.

Corporate Brochure

SOLATO will  
continue to challenge itself  
to create the future.

#### Our thoughts behind the brand

We imagined the sun traveling across the sky and heading for tomorrow and created and announced the new brand name SOLATO in 2008, in association with the new challenges of Taiyo Oil. The design of the logo symbolizes the sun, the earth, and roads leading to tomorrow.

Our slogan is “Energy for this planet and its people.” We cherish the world’s people more than anything else, wishing for everlasting “co-existence and co-prosperity” on this planet where we live. The word “energy” expresses our wish to convey a “sense of justice” as an integrated energy company.

We believe that if people become more energetic, the world will become more fun, stronger and more beautiful and tomorrow will become more comfortable.

SOLATO will continue to challenge itself to create the future. With unique ideas and a challenging spirit free from industry customs and practices and conventional wisdom, we will move toward the next 100 years.

We, at Taiyo Oil will, continue to make continuous efforts as an “integrated energy company” with thoughts of this new brand in mind.

\* SOLATO is a coined word combining “solar” and “tomorrow.”

## Each employee shares the same feeling.

Taiyo Oil has established its “corporate philosophy” based on its corporate mission and sense of values shared by all employees in accordance with the spirit of the “company credo,” which is the basis for management.

Furthermore, we have also established a “corporate course of action” for performing corporate activities to realize our “corporate philosophy.”

#### Company Credo

**Independence and self-respect**  
**Enterprising spirit and aggressiveness**  
**Co-existence and co-prosperity**

#### Corporate Philosophy

**Like the beaming sun,**

We at Taiyo Oil, an integrated energy company, will attempt to harmonize with the global environment and provide security and safety so as to contribute to the creation of an enriched society.

We will attempt to promote harmony with all members of society through our business activities and to create new value through an aggressive and bold approach that strives toward building a company with sustainable growth potential.

#### Corporate Course of Action

Taiyo Oil acts in good faith in accordance with the following guidelines:

##### **Safe operation**

We will give top priority to workplace and regional safety and will strive for safe and stable operation.

##### **Environmental preservation**

We will attempt to reduce environmental burdens and save resources and energy and make efforts to preserve the global environment.

##### **Regional contribution**

As a good corporate citizen, we will contribute toward regional development.

##### **Customer satisfaction**

We will provide high-quality products stably in order to win customer satisfaction and trust.

##### **Respect for the individual**

We will respect each of our employees and provide a rewarding workplace.

##### **Compliance**

We will comply with laws and regulations, abide by the norms of society and the company and conduct ourselves according to our conscience.

##### **Transparency**

We will attempt to communicate widely with society and to enhance the transparency of our business activities.

**We aim for sustainable growth by establishing an integrated operating system.**

Taiyo Oil aims to become a company that can achieve sustainable management with the establishment of an “integrated operating system” ranging from importing oil to manufacturing and sales of petroleum products and petrochemical products.

**Imports**

**We mainly import environmentally friendly low-sulfur crude oil.**

Japan imports nearly all of its oil which is indispensable to our daily lives and industrial activities by large tankers from oil-producing countries in the Middle East, Southeast Asia, etc. Taiyo Oil mainly imports environmentally friendly low-sulfur crude oil from various oil-producing countries such as Saudi Arabia, Malaysia, Brunei, Indonesia and Russia and transports it safely to its Shikoku Operations.

**Refining and Manufacturing**

**High-quality, environmentally friendly products**

In order to respond to various demands for oil, Taiyo Oil makes continuous efforts to constantly produce high-quality, environmentally friendly petroleum and petrochemical products as well as to ensure a safe and stable supply of products. Both the Shikoku and Yamaguchi Operations have been certified for ISO9001 (Quality Management System) and ISO14001 (Environmental Management System) and operate with consideration for quality assurance, quality maintenance and environmental preservation.

**Supply**

**Our mission is to provide a safe and stable supply.**

Taiyo Oil stably supplies earth-friendly products to meet various customer needs. In order to ensure that our petroleum products which are widely used not only in our daily lives but also for industrial activities are delivered to our customers safely and reliably we actively work to strengthen and streamline our production facilities and expand our distribution facilities in an effort to secure a stable supply.

**Sales**

**We provide high-quality services.**

Taiyo Oil actively works to create SOLATO service stations that achieve customer satisfaction by cultivating human resources who can perform value-added services from the customer’s perspective in every scene so that customers choose us and customer satisfaction is always ensured.

**Taiyo Oil transports “peace of mind.”**

We mainly import environmentally friendly low-sulfur crude oil.

Taiyo Oil mainly imports environmentally friendly low-sulfur crude oil from Saudi Arabia, Malaysia, Brunei, Indonesia, Russia, etc., and strives to ensure efficient and safe transportation.

Shikoku Operations/Oil Refining Facilities

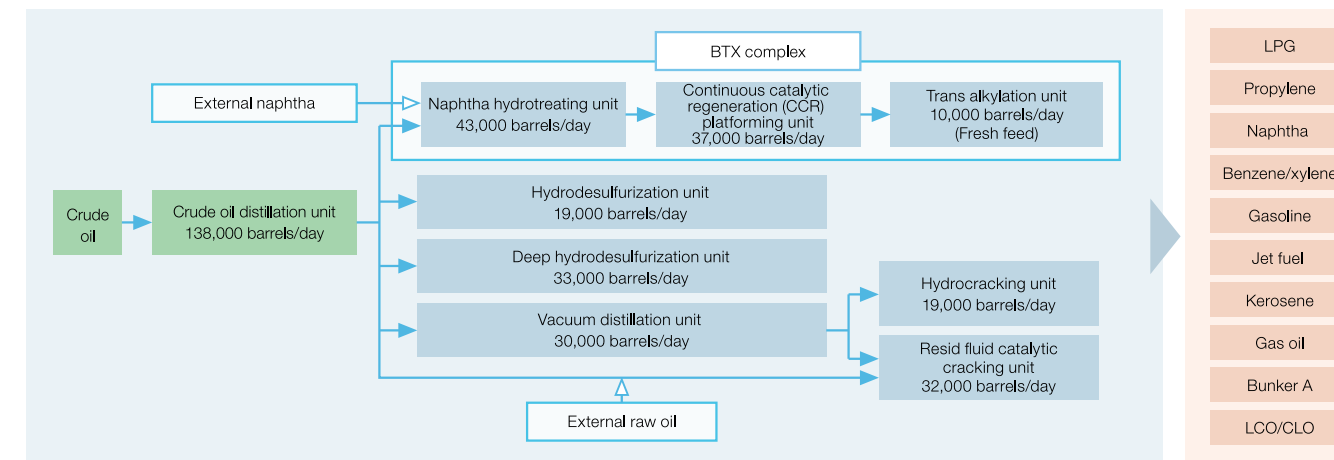

We respond to a wide range of petroleum needs with safety as our top priority.

As an integrated energy company, we respond to a wide range of petroleum and petrochemical product needs and meet customer expectations with our safe and stable operations.

[Imabari City, Ehime Prefecture]

Refining flow diagram

Crude oil distillation unit

Crude oil is distilled and fractionated into LPG, naphtha, kerosene, gas oil and residual oil.

Hydrocracking unit

This unit produces high-quality naphtha, kerosene and gas oil by mixing vacuum gas oil which is distilled from residual oil in the vacuum distillation unit with hydrogen gas and reacting it with a catalyst in a high-temperature and high-pressure atmosphere.

Resid fluid catalytic cracking unit

This unit produces propylene, LPG and gasoline fractions by decomposing heavy oil which is the raw material by contacting with a catalyst in a high-temperature and low-pressure atmosphere.

BTX complex

Benzene and xylene are produced by hydro-treating and catalytically reforming naphtha which is the raw material and then distilling, extracting and transalkylating the resulting reformate.

Shikoku Operations Refining and production capacity

Number of tank units and oil storage capacity

Crude oil storage tanks	9 units	638,406kl
Product and semi-processed product tanks (including tanks for petrochemical products)	69 units (4 units)	524,535kl (37,563kl)
Slop tanks	4 units	18,691kl
Home fuel tanks	3 units	2,150kl
LPG tanks	13 units	11,862t
Molten sulfur tanks	2 units	2,340,000kg
		1,183,782kl
<b>Total</b>	<b>99 units</b>	<b>11,862t</b>
		2,340,000kg

Refining capacity 138,000 barrels (21,942kl)/day

No. 1 Crude oil distillation unit	1 unit	106,000 barrels (16,854kl)/day
No. 2 Crude oil distillation unit	1 unit	32,000 barrels (5,088kl)/day
Vacuum distillation unit	1 unit	30,000 barrels (4,770kl)/day
Hydrocracking unit	1 unit	19,000 barrels (3,021kl)/day
Hydrogen recovery unit	1 unit	1,036,800Nm <sup>3</sup> /day
Hydrodesulfurization unit	1 unit	19,000 barrels (3,021kl)/day
Deep hydrodesulfurization unit	1 unit	33,000 barrels (5,247kl)/day

BTX complex

Naphtha hydrotreating unit	1 unit	43,000 barrels (6,837kl)/day
Continuous catalytic regeneration (CCR) platforming unit	1 unit	37,000 barrels (5,883kl)/day (including 19,000 barrels/day for petrochemicals)
Aromatics fractionation unit	1 unit	34,500 barrels (5,486kl)/day
Aromatics extraction unit	1 unit	11,000 barrels (1,749kl)/day
Hydrogen recovery unit	1 unit	2,054,400Nm <sup>3</sup> /day
Trans alkylation unit	1 unit	10,000 barrels (1,590kl)/day (Fresh feed)
No. 2 Aromatics fractionation unit	1 unit	19,000 barrels (3,021kl)/day

RFCC complex

Reid fluid catalytic cracking unit	1 unit	32,000 barrels(5,088kl)/day
Propylene splitter unit	1 unit	7,100 barrels(1,129kl)/day
Alkylation unit	1 unit	7,200 barrels(1,145kl)/day
FCC gasoline hydrodesulfurization unit	1 unit	17,000 barrels(2,703kl)/day

## Yamaguchi Operations/Petrochemical Product Production Facilities

### Yamaguchi Operations/Petrochemical Product Production Facilities

Production facilities			Number of tank units and oil storage capacity		
Ethylbenzene production unit	1 unit	397,000t/year (nominal capacity)	Benzene	2 units	9,800kl
Styrene monomer production unit	1 unit	370,000t/year (nominal capacity)	Styrene monomer	3 units	17,900kl
			Ethylene tank (including cooling facilities)	1 unit	2,900t

[Ube City, Yamaguchi Prefecture]

Production facilities

Raw materials and product storage facilities

The Yamaguchi Operations is a styrene monomer plant that boasts the largest production in Japan as a single line. By reacting benzene and ethylene, ethylbenzene is produced and the produced ethylbenzene is dehydrogenated to produce high-quality styrene monomer. Efficient operations with a relatively small staff have been achieved with the introduction of automation utilizing the most advanced technology.

## We firmly support “society” as an integrated energy company.

Taiyo Oil markets its products not only in Japan but also overseas in response to customer needs.

Shikoku Operations Dolphin Berth 122,000DWT class

Taiyo Oil stably supplies earth-friendly products to meet various customer needs. In order to ensure that our petroleum products which are widely used not only in our daily lives but also for industrial activities are delivered to our customers safely and reliably, we actively work on streamlining production facilities and expanding distribution facilities in an effort to secure a stable supply.

Shikoku Operations Lorry loading facilities

Shikoku Operations Drum distribution facilities

In the event of a large-scale disaster, we will supply petroleum products in cooperation with the Japan Ground Self-Defense Force.

Shikoku Operations Lab Center

We conduct product testing and analysis, quality control, product quality improvements, removal of harmful substances, environmental and energy-related technical R & D, etc.

Nansei Sekiyu K.K. (Nishihara-cho, Okinawa)  
Supplies petroleum products within Okinawa Prefecture via the Company's terminal.

## We deepen bonds with customers to develop new value.

We actively work to create service stations that are chosen and supported by customers.

Whether its full service or self-service, service station staff is the key to customer service. In order to earn high marks from customers and maintain customer satisfaction, providing high-quality service and a wide range of proposals are required. We aim to create SOLATO service stations that can provide value-added service from the customer's perspective to achieve customer satisfaction.

We strive to create service stations that achieve customer satisfaction by developing human resources through various workshops and seminars for service station staff, as well as providing sales support for affiliated service stations through sales promotion activities.

## We contribute to the realization of Sustainable Development Goals (SDGs).

### Initiatives for Safety

Safe and stable operations are the foundations of management.

Based on "safety first" and "respect for human life," we strive to prevent accidents and disasters.

#### Security control systems

At both operation sites, we have established "security control systems" in accordance with the High Pressure Gas Safety Act in order to further strengthen our security systems. In addition, we eliminate the potential for accidents and disasters and promote safer workplace environments through various safety control activities.

#### Occupational health and safety management system

##### ISO45001 certification (Shikoku Operations)

Date of certification	January 31, 2020
Certification body	The High Pressure Gas Safety Institute of Japan (KHK) ISO Center

The Shikoku Operations have established an occupational health and safety management system and obtained ISO45001 certification.

#### Disaster prevention organizations

Both operation sites have established self-defense disaster prevention organizations, which conduct disaster prevention drills on a regular basis to ensure that all members can promptly respond in the event of a disaster as well as improve their disaster prevention skills.

Foam firefighting by firefighting team

Disaster prevention center and chemical fire engines

### Environmental Initiatives

For harmony with the global environment

Taiyo Oil strives to preserve the environment as an integrated energy company.

#### Environmental management system

##### ISO14001 certification (Shikoku Operations)

Date of certification	March 22, 2002
Certification body	The High Pressure Gas Safety Institute of Japan (KHK) ISO Center

##### ISO14001 certification (Yamaguchi Operations)

Date of certification	March 24, 2003
Certification body	Japan Chemical Quality Assurance Ltd.

Both operation sites have established environmental management systems and acquired ISO14001 certification.

### Initiatives for New Businesses

Creation of sustainable businesses and establishment of mechanisms

- Current initiatives
  - Establishment of a joint venture "SDT Solar Power Co., Ltd."
  - Investment in LE SYSTEM Co., Ltd., and conclusion of a basic agreement on business alliance with the company

### Community and Social Contribution Activities

What we can do for society and the community

Taiyo Oil is engaged in community-based activities so that it can contribute widely to society as an integrated energy company.

#### Cleanup activities around operation sites

At both operation sites, employees actively engage in voluntary cleanup activities along roadsides around operation sites.

#### Sun (Taiyo)-nurtured Forest

Taiyo Oil has concluded a "Collaborative Forest Restoration Project" agreement with Kochi Prefecture and Ino-cho and a "Corporate Afforestation Activities" agreement with Ehime Prefecture and Imabari City. The forests where Taiyo Oil is active are named "Sun (Taiyo)-nurtured Forest" and through forest maintenance activities, Taiyo Oil participates in environmental conservation and exchanges with local residents.

#### Ehime University "Taiyo Oil Scholarship"

Cooperating with Ehime University, we have established the "Taiyo Oil Scholarship," a grant-type scholarship system that aims to reduce the economic burden of their students and support the creation of an environment where students can focus on their academic performance. In this scholarship system, the donations from our company to Ehime University's students are managed as funds. The students who are chosen for the scholarship are provided money equivalent to their annual course fees.

## Our challenge of supporting the daily lives of people throughout society has continued for more than 110 years and will continue further as a new future unfolds.

As a company that handles petroleum and petrochemical products that are indispensable to maintaining social infrastructure functions, we assume great responsibility in supporting the lives of people. At the same time, we recognize that society keeps a watchful eye on our operations with respect to safety and environmental matters. While upholding our corporate social responsibility as a maintainer of business activities and infrastructure in the supply of energy, we aim to become a company that is supported by various stakeholders based on our corporate philosophy.

### Earliest Days

From the establishment of Aoki Sekiyu, our predecessor, until the establishment of Taiyo Oil

## 1908-1943

<b>1908</b> (Meiji 41)	September	Shigekichi Aoki, the founder, established Aoki Sekiyu in Takaoka-gun, Kochi Prefecture (currently Tosa City).
<b>1915</b> (Taisho 4)	February	Relocated to Yawatahama City in Ehime Prefecture.
<b>1918</b> (Taisho 7)	January	Kerosene production was started from the materials supplied by Rising Sun's Kyushu-Saitozaki Oil Refinery.
<b>1923</b> (Taisho 12)	August	Started to refine oil in a Hickman Distillation (Method) Unit.
<b>1930</b> (Showa 5)	May	Renamed as Aoki Sekiyu Co., Ltd. Capital of JPY 20 thousand.
<b>1938</b> (Showa 13)	October	Plant relocated to Kameoka Village in Ochi-gun, Ehime Prefecture (the current site of Shikoku Operations).
<b>1941</b> (Showa 16)	February	Refinery sections of Aoki Sekiyu, Mikado Seiyu and Matsuoka Sekiyu were integrated into Taiyo Oil Co., Ltd. Head office was established in Mita-toyooka-cho, Shiba-ku, Tokyo. Capital of JPY 1 million.
<b>1943</b> (Showa 18)	July	Head office was relocated to Yawatahama City in Ehime Prefecture. Capital increased to JPY 4 million.

First President Shigekichi Aoki

### Postwar Recovery Period

Full-scale independent production activities began during this period.

## 1949-1964

<b>1949</b> (Showa 24)	December	Permission granted by GHQ to reopen refineries on the Pacific Coast. Construction of facilities for crude oil distillation was started.
<b>1951</b> (Showa 26)	February	Permission granted to refine petroleum. An order from Shell Sekiyu was received and a refinery with an output of 500 barrels/day was started.
<b>1953</b> (Showa 28)	July	Capital increased to JPY 48 million. Taiyo Oil started to operate its own refinery.

<b>1958</b> (Showa 33)	October	Soviet crude oil was imported to Japan for the first time.
<b>1964</b> (Showa 39)	June	Ryosaku Aoki became the second president. Capital increased to JPY 52 million.
	September	Romanian crude oil was imported to Japan for the first time.
	November	Capacity of the crude oil distillation unit was confirmed to be 59,000 barrels/day.

Second President Ryosaku Aoki

### Growth Period

Upgrading of refining operations on a full-scale basis began during this period.

## 1965-1991

<b>1965</b> (Showa 40)	September	Shigeyoshi Aoki became the third president.
<b>1967</b> (Showa 42)	July	Capital increased to JPY 100 million.
<b>1969</b> (Showa 44)	April	Taiyo Oil became a member of the Petroleum Association of Japan.
<b>1970</b> (Showa 45)	December	Capital increased to JPY 400 million.
<b>1974</b> (Showa 49)	September	Capacity of the crude oil distillation unit was augmented to 69,000 barrels/day.
<b>1975</b> (Showa 50)	July	Kikuma Refinery (currently Shikoku Operations) received JIS (Japanese Industrial Standards) accreditation.
<b>1976</b> (Showa 51)	July	Established a 90-day petroleum stockpiling system.
<b>1977</b> (Showa 52)	January	Taiyo Oil became the first Japanese corporation to conduct DD crude oil trading with the Malaysian national petroleum corporation (PETRONAS).
<b>1979</b> (Showa 54)	October	Local Singapore subsidiary Taiyo International Private Limited was established.
<b>1981</b> (Showa 56)	November	Head office was relocated to the current location (Chiyoda-ku, Tokyo).

Third President Shigeyoshi Aoki

<b>1982</b> (Showa 57)	March	An underground oil stockpiling demonstration plant was completed on the premises of Taiyo's Kikuma Refinery. Taiyo Oil took charge of demonstration operations.
<b>1983</b> (Showa 58)	September	Reduced capacity of the crude oil distillation unit by 4,000 barrels/day to 65,000 barrels/day.
<b>1986</b> (Showa 61)	March	Made investments in the oil development project in Angola's offshore oil fields.
	November	Joined the oil development project in Malaysia's offshore oil fields.
<b>1991</b> (Heisei 3)	June	The crude oil tanker "Taiyoh I" (88,543 DWT) was put into service. With the completion of the BTX production facilities and the launch of the operation thereof, Taiyo Oil forayed into petrochemicals.
	December	The petroleum product tanker "Taiyoh II" (58,950 DWT) was put into service.

### Period of Development

Expansion of operations with the abolition of the Provisional Measures Law on the Importation of Specific Petroleum Refined Products

## 1996-2019

<b>1996</b> (Heisei 8)	July	With partial transfer of the functions of the head office, Kikuma Refinery was renamed Shikoku Operations.
<b>1998</b> (Heisei 10)	October	Participated in the Tokyo Commodity Exchange as a primary member of the oil futures market.
	December	Shikoku Operations received ISO9002 certification.
<b>1999</b> (Heisei 11)	October	Kunishi Kawai became the fourth president.
<b>2002</b> (Heisei 14)	March	Shikoku Operations received ISO14001 certification.
	July	Subsidiaries were integrated into Taiyo Techno Service Co., Ltd.
<b>2003</b> (Heisei 15)	August	Capacity of the crude oil distillation unit was augmented to 120,000 barrels/day.
	October	Taiyo Petrochemical Co., Ltd., was established.
	December	Acquired from Mitsui Chemicals, Inc., a styrene monomer plant in Yamaguchi.
<b>2004</b> (Heisei 16)	January	Yamaguchi Operations opened.
	December	Subsidiaries were integrated into Taiyo Oil Sales Co., Ltd.
<b>2006</b> (Heisei 18)	June	Yutaka Oka became the fifth president.
<b>2008</b> (Heisei 20)	March	A new office and new onshore shipping facilities on the premises of Shikoku Operations were completed.
	September	100th Anniversary of the company's foundation

<b>2008</b> (Heisei 20)	September	A new brand "SOLATO" and a new company's logo were introduced. Every item sold or installed at SS was redesigned.
	December	New ground loading facilities were completed.
<b>2009</b> (Heisei 21)	March	Capital increased to JPY 900 million.
	September	Capital increased to JPY 2.65 billion.
	December	Capital increased to JPY 4.65 billion.
<b>2010</b> (Heisei 22)	March	Capital increased to JPY 5.6 billion.
	November	Completion of the construction and startup of Resid Fluid Catalytic Cracking Unit with a capacity of 25,000 barrels/day.
<b>2014</b> (Heisei 26)	March	Merged with Taiyo Petrochemical Co., Ltd. Reduced capacity of the crude oil distillation unit to 118,000 barrels/day.
	August	Capacity of the Resid Fluid Catalytic Cracking Unit was augmented to 29,000 barrels/day.
	November	Completion of the construction and startup of Trans alkylation unit with a capacity of 10,000 barrels/day.
<b>2016</b> (Heisei 28)	December	All shares of Nansei Sekiyu K.K. acquired.
<b>2017</b> (Heisei 29)	March	Capacity of the crude oil distillation unit was augmented to 138,000 barrels/day. Capacity of the Resid Fluid Catalytic Cracking Unit was augmented to 32,000 barrels/day.
	April	Okinawa Sales Office (currently Okinawa Sales & Marketing Office), which is Taiyo Oil's first office in Okinawa Prefecture, was newly established.
<b>2018</b> (Heisei 30)	September	Capacity of the deep hydrodesulfurization unit was augmented to 33,000 barrels/day.
<b>2019</b> (Heisei 31)	March	Capital was reduced to JPY 400 million.
